

BID COMPARISONS

EMERGENCY GENERATOR INSTALLATION AT MUNICIPAL OFFICES

The project includes the following:

- Installation and connection of one (1) Pad Mount 48KW Diesel Generator – 120/240 Volt Single Phase
- Installation and connection of one (1) 400 Amp Automatic Transfer Switch - Service Rated
- Installation of appropriately sized concrete pad for placement of generator; and any required backfill and site restoration
- All wiring, conduit, and related supplies and materials to adequately complete the project

The successful contractor must obtain all required Frederick County permits and inspections; provide generator start up, walk through, and training for town personnel; and include a one (1) year maintenance contract.
